“We don’t just implement technology. We build solutions that grow with your business.”

Tom De Greef
Managing Director Technology Services

Why would you choose Grant Thornton?

Our approach is built on a genuine interest in our clients, their challenges, growth ambitions, and business environment.

Rather than offering off-the-shelf solutions, we take the time to ask questions and listen carefully. This enables us to build stronger relationships with our clients and provide advice that delivers long-term value. At Grant Thornton, we strongly believe in a personal approach. We consider it essential to know and understand our clients, allowing us to respond to their unique needs and objectives.

Grant Thornton combines deep accounting and financial expertise with hands-on technology implementation. Our multidisciplinary teams bridge the gap between finance and technology, ensuring that tools are not only implemented correctly, but also fully aligned with your financial processes.

We don’t just advise; we build, integrate, and optimise solutions that deliver immediate and long-term impact. Our support doesn’t stop at go-live. We continue to support and guide you over time, adapting solutions as your business evolves and make sure you get the most value out of your technology.

Our services at a glance

Our multidisciplinary expert teams work together and help you unlock your potential for growth.

- Private client services
- Customs & global trade

Gain control of your digital ecosystem

As organisations evolve, so does the complexity of their digital landscape. Multiple systems, increasing data volumes, and changing business requirements can make it difficult to maintain efficiency and visibility. The right foundation helps organisations stay agile, connected, and ready for future growth.

Making the right technology decisions requires more than technical expertise alone. It demands a clear understanding of your business objectives, financial processes, and long-term growth ambitions.

Technology Services helps organisations transform their finance function through the smart use of technology. We combine ERP systems, automation, integrations, and reporting tools into one connected ecosystem. Enabling more efficient processes, reliable data, and real-time insights.

By aligning technology with your business needs, we create a scalable and future-proof foundation that supports better decision-making and sustainable growth.

It is a model that enables organisations to become digital-first through flexible, modular technology solutions, such as

ERP implementation & optimisation

Real-time financial reporting & insights

System integrations & data flows

Process automation & digital workflows

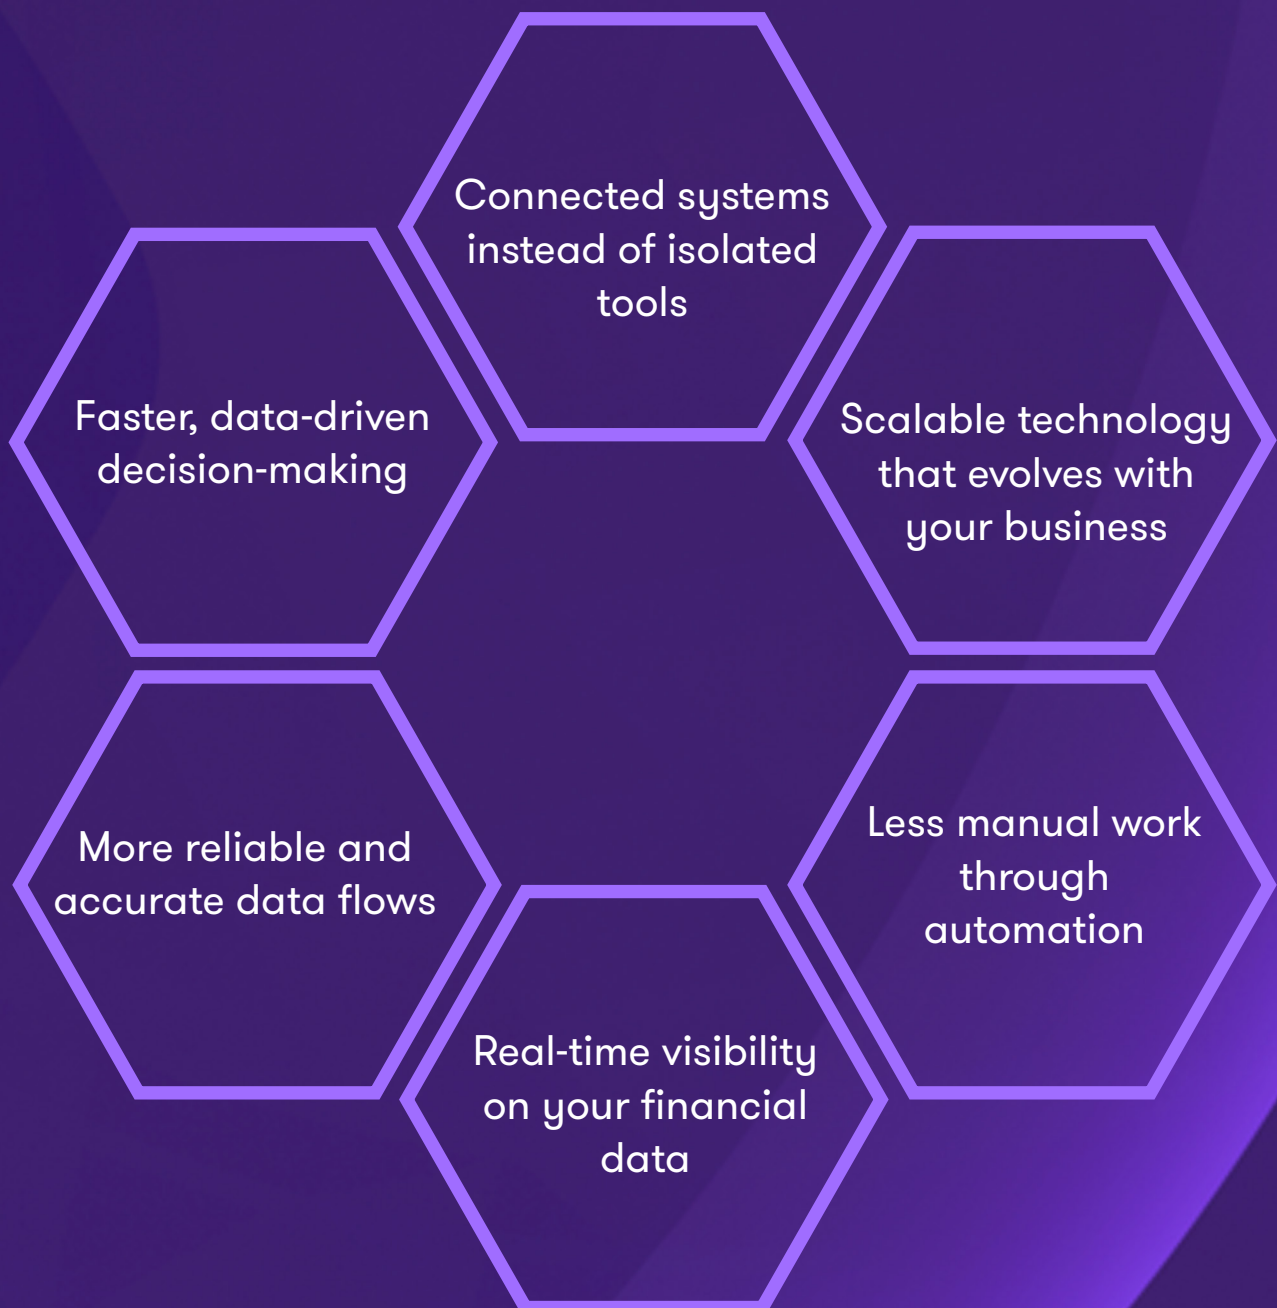

Data & dashboarding solutions

Ongoing support & optimisation

Why Technology Services benefits your business

Our areas of expertise

From implementation to optimisation

Technology alone does not create value. Success comes from aligning systems, processes, and data with your business objectives.

Design

- Business process analysis
- ERP selection & roadmap
- Digital transformation guidance

Implement

- Odoo implementation
- Configuration & deployment
- Data migration
- System integrations

Optimise

- Workflow automation
- Reporting & dashboards
- Process improvement
- Continuous support

Grow

- Scalable solutions
- Advanced analytics
- Ongoing optimisation
- Future-proof technology foundations

Odoo: A powerful platform, when built on the right foundations

Odoo offers endless possibilities to support and automate business processes. However, with flexibility comes complexity. As organisations grow and evolve, maintaining consistency, data quality and clear processes becomes increasingly important.

From flexibility to control

A successful Odoo environment balances flexibility with structure, ensuring that processes remain efficient, data remains accurate and reporting remains trustworthy.

Turning data into confidence

The true value of an ERP system is not only in its functionality, but in the trust organisations can place in their data.

- Reliable and consistent information
- Clear and controlled processes
- Accurate financial and operational reporting
- Reduced risk of manual errors
- Better visibility for informed decision-making
- A scalable foundation for future growth

“Trust your processes. Trust your data. Trust your decisions.”

Ready to transform?

Every successful technology transformation starts with the right conversation. Get in touch with our team to discover how we can help you connect systems, streamline processes, and drive sustainable growth.
