

# GDPR (General Data Protection Regulation)

## The journey we take together

### GDPR, the new and obligatory way to protect your personal data

The importance of protecting your personal data will only increase in the following years. You will receive requests more often from customers or suppliers to prove that you are GDPR compliant. By May 25<sup>th</sup>, 2018, the protection of your personal data should be ensured. What are the implications for your organization?

Grant Thornton maps the challenges concerning data protection together with you and provides you with a clear roadmap. You can rely on our team of experts that consists of Business Risk advisors, legal experts and IT specialists. To be GDPR compliant you need to combine law, process, IT and governance and think about your digital future.

### Our services include:

**Cloud contracting**

**Risk modeling & Risk management**

**Data Governance & Data Lifecycle management**

**Readiness assessment & Gap detection**

**Security & Breach management**
